

PLEASE JOIN US FOR THE

TOWN & GOWN WINTER LUNCHEON

FEATURED SPEAKER: DR. DEBY CASSILL

RECENT EVIDENCE SUGGESTS THAT LIFE BEGAN 4.2 BILLION YEARS AGO. FOR 3.7 BILLION YEARS, EARTH WAS AN ALL-FEMALE PLANET. ONLY IN THE LAST 600 MILLION YEARS DID MULTI-CELLED FEMALES BEGIN TO PRODUCE SONS IN ADDITION TO DAUGHTERS. THE RESULT WAS THE CAMBRIAN EXPLOSION, A PERIOD OF RAPID SPECIES INNOVATIONS DURING WHICH FUNGI, PLANTS, AND ANIMALS EMERGED FROM THE SEAS AND COLONIZED LAND. WHY MOST FEMALES PRODUCE SONS IN ADDITION TO DAUGHTERS IS A QUESTION THAT HAS RARELY BEEN ASKED. MATERNAL RISK MANAGEMENT PROVIDES AN ANSWER. STAY TUNED! ALL WILL BE REVEALED.

JANUARY

31

AT 11:30 AM

LYNN PIPPENGER HALL, 4TH FLOOR

\$30.00 PER PERSON*

*ESTIMATED FAIR MARKET VALUE OF THE LUNCH INCLUDING TAX IS \$30.00 AND IS NOT TAX-DEDUCTIBLE
